Math 2 – Honors
 Unit 1 – Geometric Transformations
 Lesson 2 – Reflections

Name _____

Date _____ Pd _____

Reflections:

- A reflection is a transformation in which the image is a mirror image of the preimage.
- A point on the line of reflection maps to itself.
- Other points map to the opposite side of the reflection line so that the reflection line is the perpendicular bisector of the segment joining a preimage and image point.
- Preimage and image points are **equidistant** from the line of reflection.
- Notation for reflections is $R_{\text{Line of Reflection}}$. Example: $R_{x\text{-axis}}$ means reflection in or across the x – axis.

 $R_{y\text{-axis}}$ $R_{y=x}$ $R_{y=-x}$ $R_{y=4}$

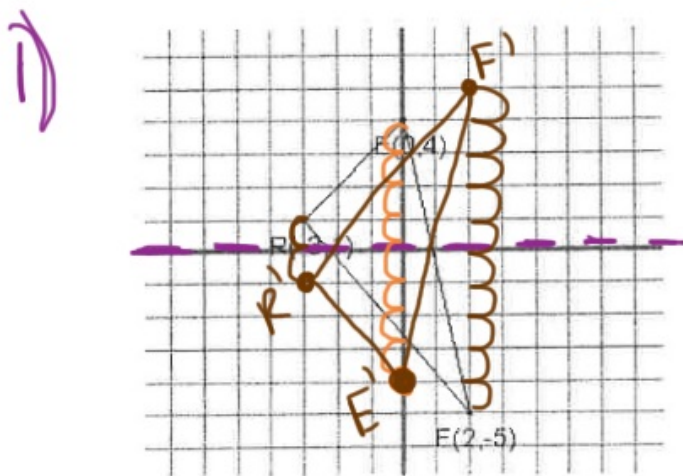

Created with Doceri

Reflections in the coordinate plane. Given $\triangle REF$: $R(-3, 1)$, $E(0, 4)$, $F(2, -5)$

- 1) On the first grid, draw the reflection of $\triangle REF$ in the x -axis. Notation: $R_{x\text{-axis}}$
 Record the new coordinates: $R'(\underline{3}, \underline{-1})$, $E'(\underline{0}, \underline{-4})$, $F'(\underline{2}, \underline{5})$

- 2) On the second grid, draw the reflection of $\triangle REF$ in the y -axis. Notation: $R_{y\text{-axis}}$
 Record the new coordinates: $R'(\underline{3}, \underline{1})$, $E'(\underline{0}, \underline{4})$, $F'(\underline{-2}, \underline{-5})$

Created with Doceri

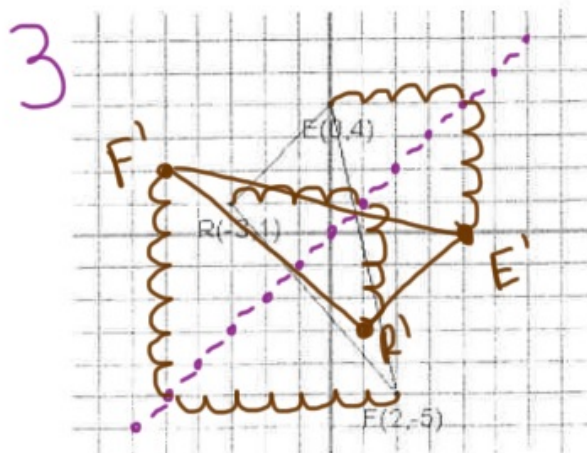

3) Graph the line $y = x$ on the third coordinate grid. Reflect the triangle in the line $y = x$.

Record the new coordinates: $R'(1, -3)$, $E'(4, 0)$, $F'(-5, 2)$ Notation: $R_{y=x}$

4) Graph the line $y = -x$ on the fourth coordinate grid paper. Reflect the triangle in the line $y = -x$.

Record the new coordinates: $R'(-1, 3)$, $E'(-4, 0)$, $F'(5, -2)$ Notation: $R_{y=-x}$

6

Look at the patterns and complete the rule. Then write the rule using proper notation.

1. Reflection in the x - axis maps $(x, y) \rightarrow (\underline{x}, \underline{-y})$

Notation: $R_{x\text{-axis}}$

2. Reflection in the y - axis maps $(x, y) \rightarrow (\underline{-x}, \underline{y})$

Notation: $R_{y\text{-axis}}$

3. Reflection in the line $y = x$ maps $(x, y) \rightarrow (\underline{y}, \underline{x})$

Notation: $R_{y=x}$

4. Reflection in the line $y = -x$ maps $(x, y) \rightarrow (\underline{-y}, \underline{-x})$

Notation: $R_{y=-x}$

Reflections with Polygons

Reflection Symmetry

1. Given *Triangle ABC*.

a. What is the equation of the line of reflection that maps angle A onto angle B? $x=7$

b. If we reflect *Triangle ABC* over the line of reflection found in part a, \overline{AC} maps to \overline{BC} .

c. What can we conclude about the measures of $\angle A$ and $\angle B$?
What can we conclude about the lengths of \overline{AC} and \overline{BC} ?

d. What kind of triangle is *ABC*?

\cong b/c map onto another
 $R_{x=7}$

Isosceles

Created with Doceri

2. Given Regular Hexagon $ABCDEF$.

a. List the three lines of symmetry drawn on the diagram at right: \overline{FC} , \overline{EB} , \overline{DA}

b. What is the image of point D when reflected across \overline{BE} ?

F

c. What is the image of $\angle OED$ when reflected across \overline{FC} ?

$\angle OAB$

d. What conclusions can you make about these angles?

\cong b/c reflection map onto another

e. Draw the other 3 lines of symmetry not already shown on the diagram.

✓

3. Given Quadrilateral $ABCD$.

a. The slope of \overline{BC} is 0 . The slope of \overline{AD} is 0 .
What kind of quadrilateral is $ABCD$? Explain how you know.

Trapezoid

b. Let line m be the equation of the reflection line mapping \overline{CD} to \overline{BA} .
Write the equation of line m .

$x = -4$

c. Reflect Quadrilateral $ABCD$ over line m .

$\angle A$ maps to $\angle D$ $\angle B$ maps to $\angle C$

What can be concluded about both pairs of base angles? \cong
Therefore an isosceles trapezoid

2) reflection across $y = x$

Notation:

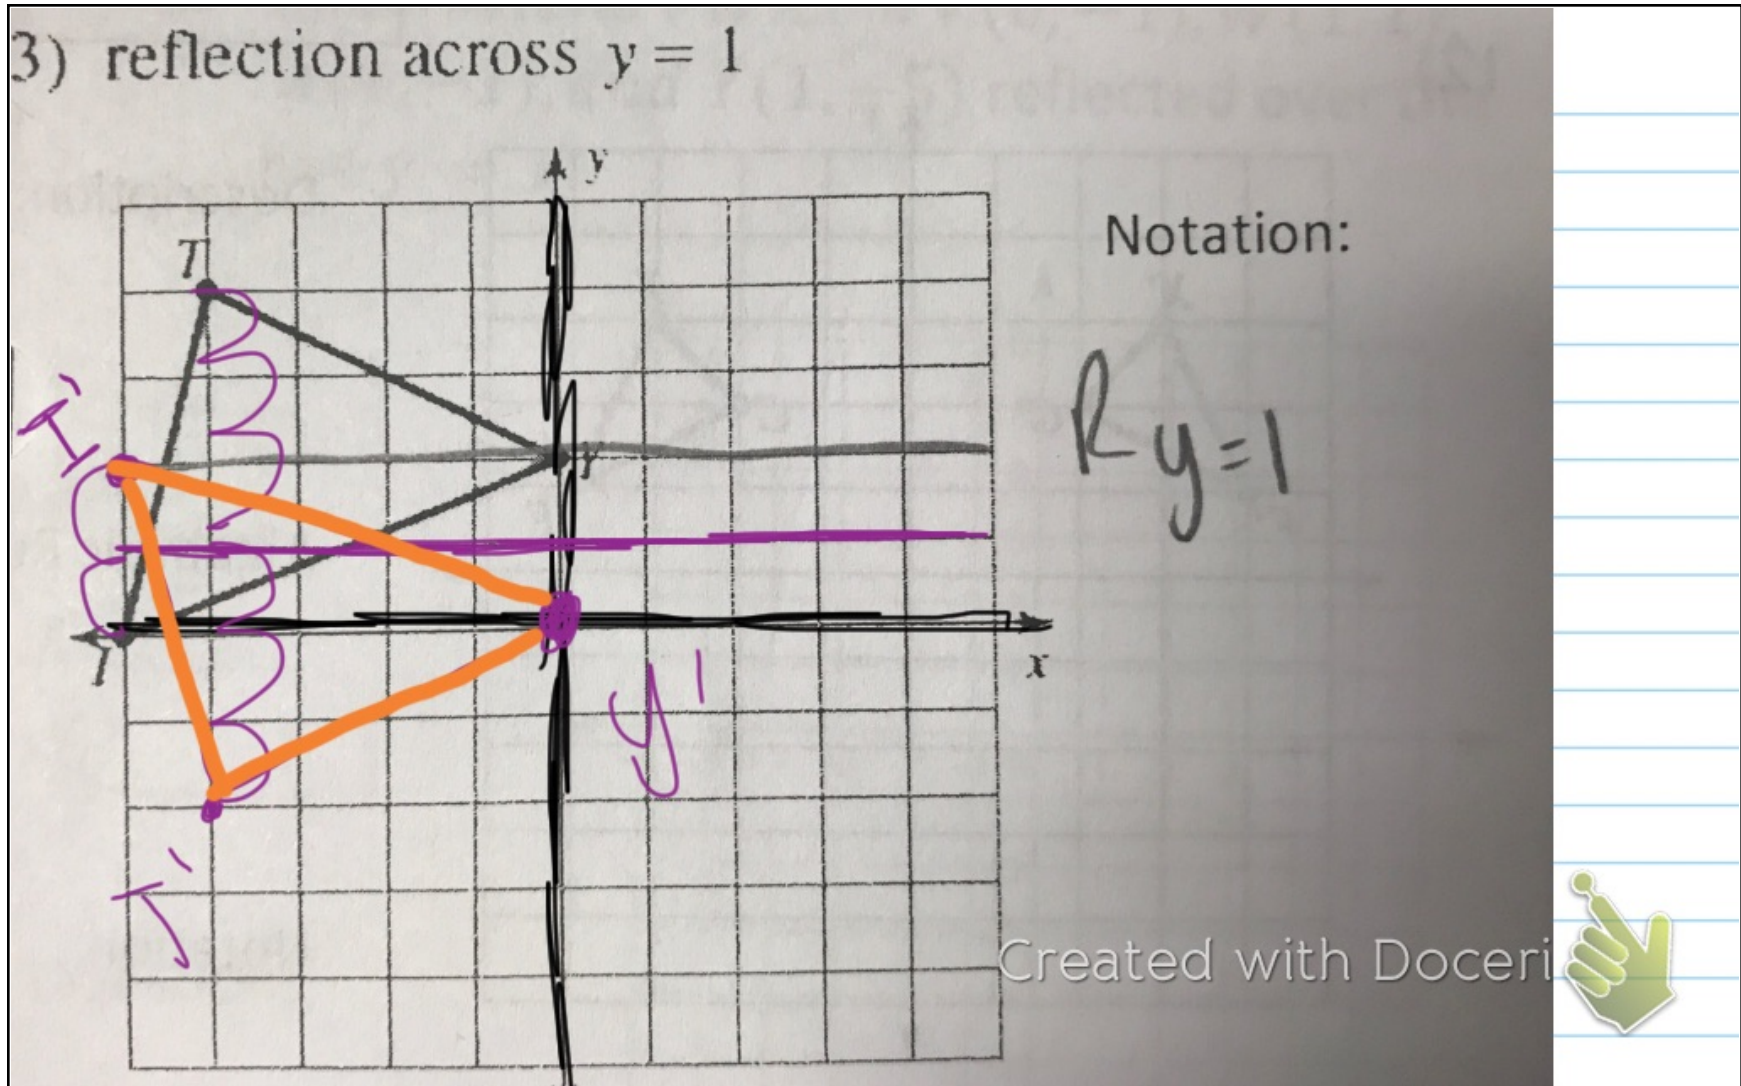

$$R_{y=x}$$

Algebraic Rule:

$$(y, x)$$

Created with Doceri

6) reflection across $y = -2$
 $H(-1, -5), M(-1, -4), B(1, -2), C(3, -3)$

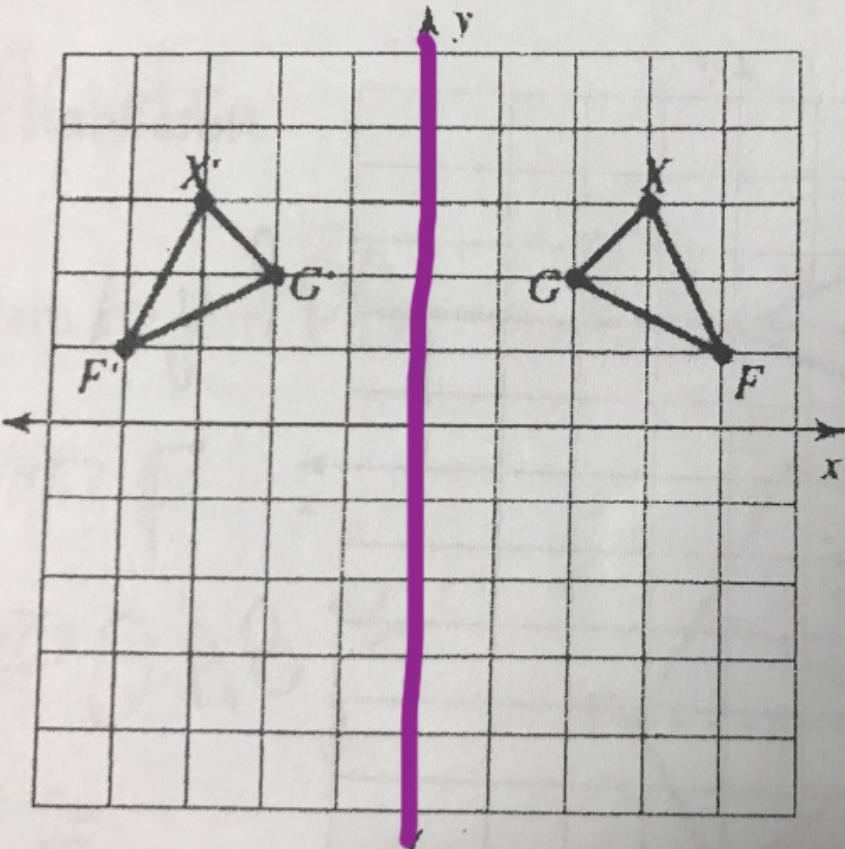

Notation:

R_{-2}

Created with Doceri

12)

Description:
Reflect Y-axis / $x=0$

Algebraic Rule

Notation:

Created with Doceri 

13)

14)

Description:

Reflect $y = -x$

Algebraic Rule:

Notation:

$R_{y = -x}$

Created with Doceri

14)

Description:

Reflect $y=x$

Algebraic Rule:

(y, x)

Notation:
